

RIT BAG™

GET IN - GET THEM AIR - GET THEM OUT - FAST

The **T.E.X.S.** **Tactical Extraction** **System**

The T.E.X.S. is a compact tool designed to give firefighters more options to drag, lift and carry.

When should a T.E.X.S. be deployed? Anytime you have larger structures or multi-story buildings.

5 grab points and a design that confines a hypoxic victim gives the rescue team full control over debris, up and down stairs and out windows.

Underside of T.E.X.S. contains a drag pad designed to be easily replaced.

The T.E.X.S. gives rescue teams more efficient grab, lift and carry points, maximizing the full strength of the rescue team.

Materials and Construction

EGNIS-Skin Fire Retardant Cotton Duck
Seat belt webbing
